Patient insurance benefit investigation is provided as a service by the support services administrator under contract for Pharmacyclics LLC and Janssen Biotech, Inc. In this regard, the support services administrator assists healthcare professionals in the determination of whether treatment could be covered by the applicable third-party payer based on coverage guidelines provided by the payer and patient information provided by the healthcare provider under appropriate authorization following the provider's exclusive determination of medical necessity.

Importantly, insurance verification is the ultimate responsibility of the provider. Third-party reimbursement is affected by many factors. Therefore, the support services administrator, and Pharmacyclics LLC and Janssen Biotech, Inc. make no representation or guarantee that full or partial insurance reimbursement or any other payment will be available. This information is provided as an information service only. While the support services administrator tries to provide correct information, it and Pharmacyclics LLC and Janssen Biotech, Inc. make no representations or warranties, expressed or implied, as to the accuracy of the information. In no event shall the support services administrator, or Pharmacyclics LLC and Janssen Biotech, Inc. or its employees or agents be liable for any damages resulting from or relating to the services. All providers and other users of this information agree that they accept responsibility for the use of this service.

Pharmacyclics LLC and Janssen Biotech, Inc. assumes no responsibility for, and does not guarantee, the quality, scope, or availability of the services including, but not limited to, reimbursement support services, patient education, and other support services. Each provider, not Pharmacyclics LLC and Janssen Biotech, Inc., is responsible for the services they provide. These support services have no independent value to providers apart from the product and are included within the cost of the product.
